

LEAD FREE (Green Energetic) TIME DELAY FUSE FOR TCP APPLICATIONS

Author: Alex Linville (Pacific Scientific, EMC) | Poster ID: IPS-14-28

THE CHALLENGE

Improve operating efficiency, reliability and safety with less environmental impact.

THE BENEFIT

A reduction of hazardous exposure during manufacturing, loading, assembly, handling and field assembly and cleaning operations.

THE SOLUTION

Lead azide free time delay fuse less sensitive to impact or friction events with improved high order detonation and reliability.

KEY FEATURES

Cobalt based CLCP lead free energetic
No modifications to existing perforating gun hardware needed
Tested reliably at 400°F for 16 hours

**OWEN
OIL TOOLS**
